KWON YEWON

B.S. Candidate, Duksung Women's University
e0ng.github.io | github.com/e0ng | aliceywkwon@naver.com
Seoul Area, South Korea

RESEARCH INTERESTS

- Computer Graphics and 3D Reconstruction of Real-World Spaces
- Generative AI for 3D and Visual Content (Diffusion Models, LoRA Fine-Tuning)
- XR and Interactive Media

EDUCATION

Mar. 2022–Feb. 2027 **Duksung Women's University, Seoul, South Korea**
B.S. in IT Media Engineering (Expected Feb. 2027)
GPA: 4.1/4.5 | Ranked 1st in Department (Fall 2023, Spring 2026)

PUBLICATION

2025 Youngho Kim, Junghyun Han, **Yewon Kwon**, Yeonwoo Kim, and Dahee Yoo. **"A Study on the Generative AI Reproduction of Traditional Folding Screens: Focusing on Digital Folding Screen."** The International Journal of Advanced Smart Convergence, 14(4), 305–312, 2025. doi:10.7236/IJASC.2025.14.4.305

RESEARCH EXPERIENCE

Mar.–Dec. 2025 **Undergraduate Researcher, Interactive eXperience Research Lab (IXR Lab)**

- Built a 70-image minhwa dataset (CLIP de-duplication, ViT tagging) and trained Stable Diffusion v1.5 LoRA.
- Tuned sampling steps and CFG scale; exhibited results at Art Korea Lab and Jeonju Univ. X Space.

SELECTED PROJECTS

Mar. 2026–Present **V-O — Spatial Analysis Platform from iOS Indoor Scans to VR** (Capstone)

- Turned iOS indoor scans into editable VR spaces with floor-plan-based furniture-layout optimization.
- Combined LLM-generated layout constraints (Claude API) with a rule-based optimizer.
- Deployed the pipeline as FastAPI services on AWS (EC2, RDS, S3); added a hybrid-search RAG for design rules.
- Explored 3D Gaussian Splatting, SAMPart3D, and SAM → LaMa → Hunyuan3D for reconstruction; not adopted as occluded shapes were not recovered.

Jun.–Aug. 2025 **Hwagyeong / Wind and Folding Screen — Interactive Media Art** (with MO-ON Company)

- Co-trained Stable Diffusion LoRA on ~40 minhwa and landmark images.
- Built a Unity touchscreen app that sends user-colored 3D animals to the folding-screen display via UDP.

May–Jun. 2026 **FingerType — ASL Recognition Web App**

- Retrained YOLOv8n and compared six dataset versions; self-collected hand images raised validation mAP50 from 0.946 to 0.968.

Jul.–Aug. 2026 **Mediary — AI Avatar Diary Service**

- Built an evidence-grounded LLM diary pipeline with emotion verification.

AWARDS AND CREDENTIALS

Nov. 2025 **Excellence Award, College of Science and Technology Academic Festival**
Duksung Women's University (three-person team)

Sep. 2024 **SQL Developer (SQLD)**
Korea Data Agency

TECHNICAL SKILLS

Programming	Python, C# (Unity), Java, SQL
3D & Vision	3D Gaussian Splatting, COLMAP, SAM, Blender, YOLOv8, OpenCV
Generative AI	Stable Diffusion LoRA, Hunyuan3D, LaMa
Backend & LLM	FastAPI, AWS, PostgreSQL, Claude API, RAG
